

Adding an Observation

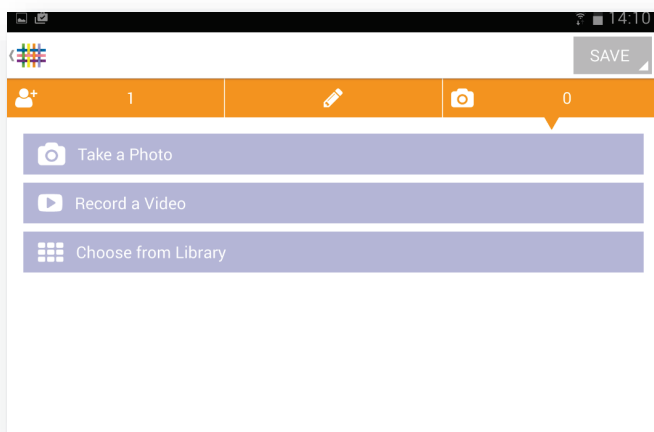

To add an observation, on the top of the home screen of the Tapestry app press the + button.

First select which child you want to make an observation for. You will only be able to select your own children who you have been linked with on this Tapestry account.

Press the pencil icon to write the text of your observation. Give your observation an appropriate title, and then enter what you want to write.

To add a photo or video to your observation, press the camera icon. Select 'take a photo' to take a photograph through the Tapestry app, and 'Record a Video' to record video through the Tapestry app. Please make sure your Android device permissions allow the Tapestry app to use the camera and the microphone.

If you recorded your media earlier or have taken it from another source press the 'Choose from Library' option. Due to the Android system, when navigating your devices media library you may have to scroll down past all the photos to find a video you have taken.

When you are finished press the 'SAVE' button to upload the observation. Depending on which options your setting has chosen, your observation may have to be approved by a member of staff before it is officially posted into your child's journal.
